SAMPLE:

The researcher finished his elementary education at Tampakan Central elementary School, Tampakan, South Cotabato. He continued his secondary education at Koronadal Academy of Tampakan Inc. as valedictorian.

With his aspiration to pursue his dreams of acquiring a degree, he continued his tertiary education at the University of Southern Mindanao, Kabacan, Cotabato and graduated as *cum laude* taking up Bachelor of Secondary Education major in Physical Science. During his stay in the University he involved himself in various activities in both academic and non-academic organizations.

"What no eye has seen, nor ear heard, nor the heart of man imagined, what GOD has prepared for those who love Him." (1 Corinthians 2:9) This particular Bible verse is what he upholds in life.

GIL FRITZ RIVAS VILLANUEVA
Researcher

ACKNOWLEDGMENT

SAMPLE:

Those who have contributions for the completion of this research study that focused on "**LIVED EXPERIENCE OF STREET VENDORS IN DOING QUALITATIVE RESEARCH**"

Mr. Samuel Jr. S. Nicolas, our adviser, for his continuous support, patience, guidance, and motivation, for sharing his knowledge to us about accomplishing a research work. His guidance helped us a lot while doing this study, we have gone through many obstacles and conquered each and every one of those during the working process of undergoing this research work. We could not have imagined having a better adviser of our research.

Senior High School Instructors, who gave us permission to conduct a survey on our selected respondents who were in their class; who also gave us the encouragement and enthusiasm to do our best.

Our beloved parents and friends who continuously giving us support and gave us the inspiration to make this research possible, our sincere thanks and gratitude were due to you.

We would like to give our utmost words of thanks to some researchers whose works were used as the reference for this research work.

This research paper would not be made possible above all without the guidance and grace of the **Lord Almighty** who is the source of everything – our strength and wisdom. All the glory and honor belong to Him.

(FIRST PARAGRAPH – Title and Research Questions only)

This study was conducted to determine the Employees' Skills Assessment of Marbel 7 National High School. Specifically, this study sought to answer the following research questions: (*indicate the research questions).*

(SECOND PARAGRAPH – Research design, Research Respondents, Research Instruments, and Statistical Treatment only)

The research design of this study was …

(THIRD PARAGRAPH – Results and Discussion and Conclusion only)

The results of the study was …

(FOURTH PARAGRAPH – Recommendations only)

The researchers would like to recommend the following …

Note: Spacing for each paragraph is 2.

A. PRELIMINARY PAGES (See sample above pages 2-9)

1. The preliminary pages must contain the following:
   a. Cover Page (See format in page 2)
   b. Bibliographical Data (See Format in page 3)
      - Each member must have one page for their bibliography. Must include basic information and motto in life.
   c. Acknowledgement (See sample in page 4
      - In the acknowledgment, the researchers should address themselves in third person. To whom the study is dedicated (all persons involved in the success of your proposal).
   d. Table of Contents (See Format in page 5-6)
   e. List of Tables (See Format in page 7)
   f. List of Figures (See Format in page 7)
   g. List of Appendices (See Format in page 8)
   h. Abstract (See Format in page 9)
      - Under the Abstract page, suggested citation in APA style will be stated. Then followed by the abstract itself.
      - It must contain the following: objectives of the study, Results, Conclusions, and Recommendations.
      - Keyword must be added.
      - Separate page.
2. The page numbers of the preliminary pages should be in roman numerals, lower cased, upper right corner. (Bookman Old Style, 12)
3. The font style to be used is Bookman Old Style in size 12. Paragraphs should be justified. Spacing varies (see samples).
4. The preliminary pages must be separated to another file to avoid distortion of page numbers.

B. CHAPTER I (See Sample in pages 13-18)

1. The chapter 1 is "Introduction". It comprises of the following:
   a. Background of the Study
      - Introduce and briefly define the variables under study
      - Cite the most important study or related literature
      - Be consistent with terms used
      - Ensure that paragraphs summarize unresolved issues, conflicting findings, social concerns, or educational, national, or international issues.
      - Write the last paragraph to highlight the **research gap.**
   b. Statement of the Problem
      - This section contains the purpose statements and the research question(s).

   Sample:

   "This study (or research) aims to… (make congruent with

title)."

"Knowing the problem, the researchers would like to determine the (Title)…"

c. Research Questions

- Phrase questions with the data to be collected in mind.
- Answer the questions and rephrase question if your intended answer does not match the question.

"Specifically, this research (or study) seeks to answer the following questions:"

d. Scope and Delimitation of the Study

SCOPE

- The scope of the study refers to the parameters under which the study will be operating.
- For example, if you are studying the ill effects of bullying on Senior High school learners, the scope could include both face-to-face bullying and cyber-bullying in grades 11 and 12.
- SCOPE: Identify the boundaries of the study in terms of respondents, objectives, facilities, area, time frame, and the issues to which the research is focused.

DELIMITATION

- Identify school involved, number of classes, their grade/year level, number of participants (or respondents, subjects), and topics of lessons covered (if applicable).
- State inadequate measures of variables, loss or lack of participants, small sample sizes, errors in measurement, and other factors typically related to data collection and analysis.

e. Significance of the Study

- States the audience who will benefit from a study of the problem and explains how exactly the results will be significant to them.
- In paragraph form, cite beneficiaries (e.g., students, professors or teachers, university administrators, parents) of results of study.
- For each beneficiary group, specifically describe how it will benefit from the findings.

f. Conceptual Framework

- Schematic diagram between the variables in the study. Must include the hypotheses.

g. Operational Definition of Terms

- Unusual terminologies that need to be define based on how the word used in the study.
- It is not the actual definition from the dictionary.

INTRODUCTION

Space

Space ***(4 single space)***

Space

Space

Background of the Study

Space

Space ***(3 single space)***

Space

Wood Bottom Ash (WBA) is a waste material that falls at the bottom of the burner unit. It can be of ash consistency or often is a semi-solid slag material and by-product of combustion from wood-fired boilers. This WBA is composed of inorganic and organic compound. Significant quantities of WBA are currently landfilled near the industry that poses a threat to the environment in many ways and to human. This WBA releases from the burners cause environmental pollution and health hazards if inhaled.

The phenomenal place of population growth and urbanization drives the cement demand to many areas in the world especially in the Philippines specifically, on its developing provinces and municipalities. The mentioned rapid change includes the technology changes the globe on greener, cleaner and environment friendly in all fields.

The higher need of cement results in alarming level of the releasing of carbon dioxide to the atmosphere. One way of handling this issue is to lower the carbon dioxide emission from cement manufacturing process by replacing cement with locally available byproducts. Ashes are one

such by-product available around from various sources (industries to agriculture).

There is an explored possibility of adding WBA with cement to concrete. WBA shows high calcium and densified silica fume blended cement paste.

To reduce the harmful effect of WBA on the environment and human, this waste can be used as a component in concrete. The utilization of WBA as cement will turn this waste material into a valuable resource. Replacing cement with WBA can also help to support the increasing demand of construction industry since nowadays the price of the cement is inflating and its composition is limited.

WBA is abundant in Pikit, Cotabato. Many bakeries, pastries, and eateries are still using woods as their main source of fire. Thus, it is essential to study the utilization of WBA as a partial replacement of cement in concrete for construction. This study deals with the possibility of using WBA in reinforcing concrete.

Statement of the Problem
Space
Space ***(3 single space)***
Space

WBA is abundant in Pikit, Cotabato. Many bakeries, pastries, and eateries are still using woods as their main source of fire. Thus, it is essential to study the utilization of WBA as a partial replacement of cement in concrete for construction. This study deals with the possibility of using WBA in reinforcing concrete.

Space ***(4 single space)***
Space
Space
Research Questions
Space
Space ***(3 single space)***
Space

The main purpose of this study is to determine the properties of concrete with WBA as partial replacement of cement. Particularly, this study will answer the following:

1. What are the effects of different proportions of Wood Bottom Ash in the compressive and flexural strength?
2. Is there any significant difference between the different proportions of Wood Bottom ash as partial cement?

Significance of the Study
Space
Space ***(3 single space)***
Space

The importance of this study is to improve a concrete by creating alternative cement using agricultural waste such as Wood Bottom Ash. This study will add an additional knowledge about the abilities of Wood Bottom Ash in securing the compressibility and flexural strength of a concrete. Lastly, this study will form a new concept in industry especially in the field of engineering for its low cost through using agricultural wastes.

Space
Space ***(4 single space)***
Space
Scope and Delimitations of the Study
Space
Space ***(3 single space)***
Space

The study was limited only on the evaluation of the compressive strength, flexural strength, and workability of concrete when percentages of Wood Bottom Ash was increased and mixed with it. The study had four treatments with three replications for flexural strength; four treatments with three replications in the control; and two replications in the following treatments for the compressive strength

Operational Definition of Terms

Space
Space ***(3 single space)***
Space

Cement is a binder, a substance used in construction that sets and hardens and can bind other materials together

Compressive Strength is the capacity of a material or structure to withstand loads tending to reduce size, as opposed to tensile strength, which withstands loads tending to elongate and determined by standard test methods (ASTM C-39)

Concrete is a hardened mixture of cement, sand and water with gravel or broken stone used in construction.

Flexural Strength is also known as modulus of rapture, bend strength, or fracture strength is a material property defined as the stress in a material just before it yields in a flexural test (ASTM C-78).

Pozzolan is a siliceous or aluminous material possesses little or no cementitious value but which will, in finely divided form and in the presence of water, react chemically with calcium hydroxide at ordinary temperature to form compounds possessing cementitious properties.

Wood Bottom Ash is a waste material that falls to the bottom of the burner unit.

Conceptual Framework (One Page)
Space
Space ***(4 single space)***
Space
Space

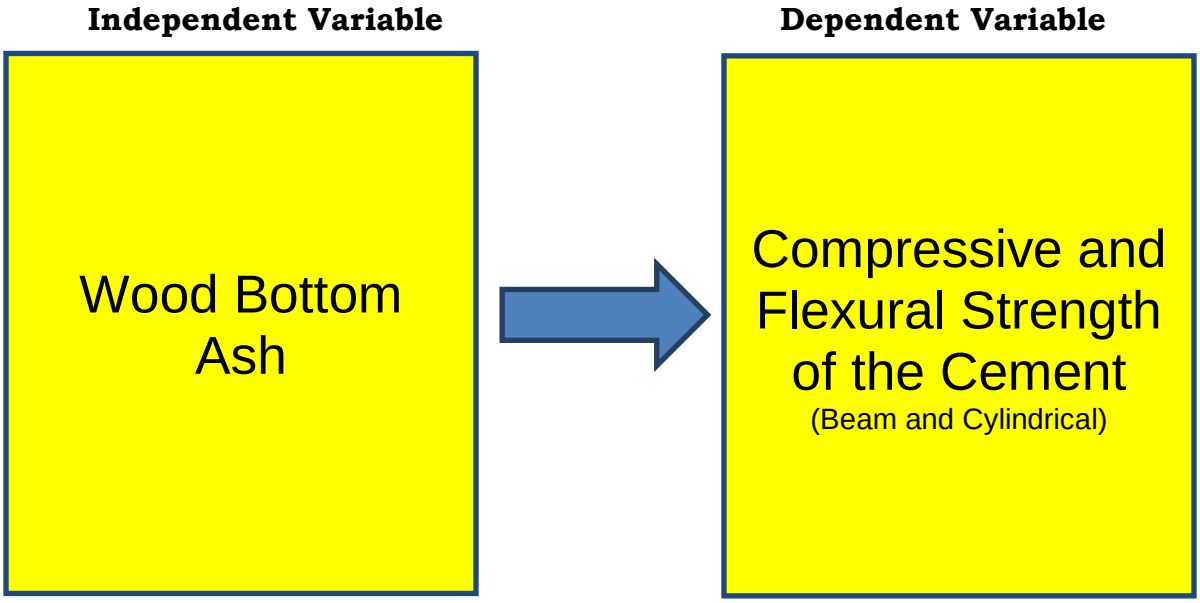

Figure 1. The schematic diagram shows the relationships between the independent variable (Wood Bottom Ash) and dependent variable (Compressive and Flexural strength of the Cement).

Space
Space ***(4 single space)***
Space
Hypotheses Statement
Space
Space ***(3 single space)***
Space

Ho: Adding WBA on concrete does not have effects and do not have a significant difference in its compressive and flexural strength.

Ha: Adding WBA on concrete have an effect and have a significant difference in its compressive and flexural strength.

-----End of Sample for CHAPTER I----

C. CHAPTER II (See sample below)

1. This chapter is the "Review of Related Literature". In-text citation should be strictly followed using APA style.
2. The order must be based on the research title. Based on the variables.
3. Avoid copy and pasting text. Make sure to paraphrase the information.
4. All cited in this chapter should be in the Bibliography.

CHAPTER II

Space

Space

REVIEW OF THE RELATED LITERATURE

Space

Space ***(3 single space)***

Space

This chapter presents notable studies related to the research study.

Space

Space ***(4 single space)***

Space

Start your information here.

NOTES:

1. In writing the RRL, in should be chronological order. Must be based on the variables in the title.

   Example of in order literature review:
   a. Agricultural wastes
   b. Woods
   c. Wood bottom ash
   d. Cement
   e. Cement with agricultural wastes
   f. Concrete
   g. Concrete with agricultural wastes
2. Include the citations of every related information.
   - ❖ Enclosed with parenthesis (Burgos, 2012)
3. Information should be current situations, starts from year 2000 and present.
4. 15-20 pages only

D. CHAPTER III *(See sample in pages 20-23)*

1. This is the "Methodology" which comprises of the following:
    a. Research Design
    - The type of research design used in the study.
    b. Research Respondents
    - The respondents involved in the study.
    c. Locale of the Study
    - Indicates where the study is to be conducted.
    d. Sampling Procedure
    - Shows the sampling technique to be employed to get the number of research respondents.
    e. Research Instruments
    - The research instrument to be administer to the research respondents. The tool in gathering data.
    a. Data Gathering Procedure
    - The steps on how to gather necessary information.
    b. Statistical Treatment
    - Specifies the statistical analysis to be used based on the gathered data in the study.
    c. Ethical Consideration
    - States that no respondents/sample will be harm all throughout the conduct of the study.
2. Parts will vary on the research design (e.g. qualitative or quantitative).
3. This chapter will contain the procedures done in the study hence each subpart has to be detailed.

CHAPTER III

Space

Space

METHODOLOGY

Space

Space

Space

This chapter presents the methods used in the study. It includes the research design, research respondents, locale of the study, sampling procedure, research instruments, data gathering procedure, statistical treatment, ethical considerations.

Space
Space ***(4 single space)***
Space

Research Design

Space
Space ***(3 single space)***
Space

The research design of this study is quantitative particularly descriptive-comparative research design, where it involves the gathering of data using survey questionnaire and to check if there is a significant difference between variables.

Space
Space ***(4 single space)***
Space

Research Respondents

Space
Space ***(3 single space)***
Space

The respondents of this study are the students of Grade 12 Science, Technology, Engineering, and Mathematics strand of Marbel 7 National High School, Senior High School Department. The total number of respondents are 80 and are divided into 2 clusters: one as the control group and experimental group, with equal number of 40 respondents per

cluster.

Space
Space ***(4 single space)***
Space
Locale of the Study *(Provide photo below from google map)*
Space
Space ***(3 single space)***
Space

This study is conducted at Marbel 7 National High School – Senior High School Department, Brgy. Topland, Koronadal City, South Cotabato, School Year 2022-2023.

Space
Space ***(4 single space)***
Space
Sampling Procedure *(Show the computation below after paragraph)*
Space
Space ***(3 single space)***
Space

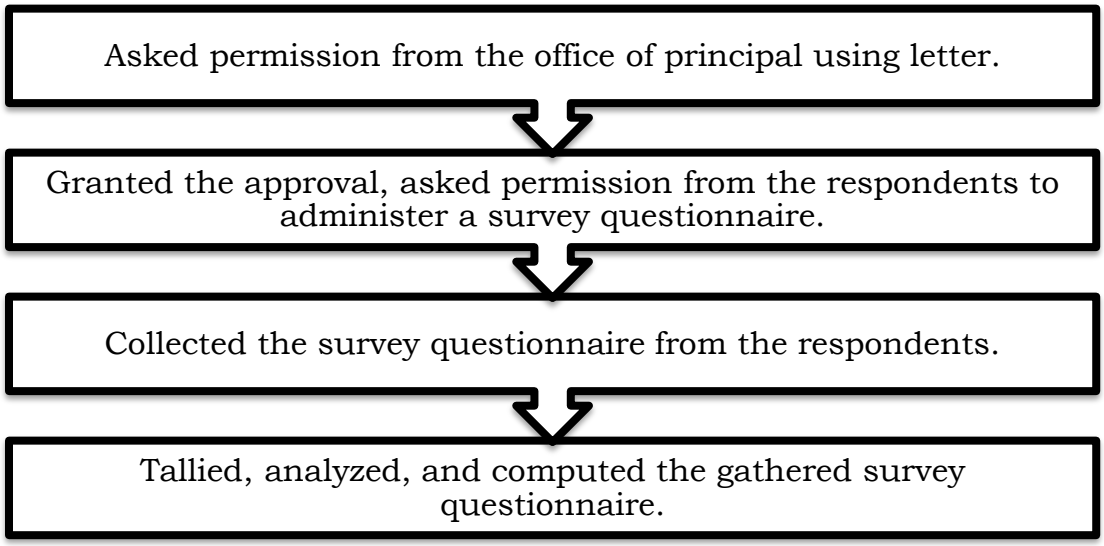

The sampling technique used in the study is stratified random sampling with equal allocation. Where the entire population is divided in two groups or cluster.

Space
Space ***(4 single space)***
Space
Research Instrument
Space
Space ***(3 single space)***
Space

The researchers' used a survey questionnaire to gather the enough data needed for the study. The survey questionnaire is divided into two parts: first is the socio-demographic profile of the respondents and second are the questions related to the study.

Data Gathering Procedure *(Flow chart)*
Space
Space ***(3 single space)***
Space

In gathering the data, the researchers follow the sequence below:

Space
Space ***(4 single space)***
Space
Statistical Treatment *(Ask help from your statistician)*
Space
Space ***(3 single space)***
Space

The collected data will be analyzed and computed using the following:

a. Descriptive statistics to get the frequency, percentage, and mean.

b. SPSS tool to solve the mean percentage of the gathered data using analysis of variance for one-way classification to determine the significant difference between variables.

NOTE: *Include the Likert-Scale table*

Ethical Consideration
Space
Space ***(3 single space)***
Space

The researchers respected the privacy of each respondent and kept their responses and identity hidden. Respondents are not forced, and they only answered the survey questionnaire in own discretion.

-----End of Sample for CHAPTER III----

E. CHAPTER IV *(See sample in page 25)*

1. This is the "Data Presentation and Analysis" or "Data Presentation and Interpretation", depending on the research design.
2. The presentation of data should be based on the order of the research questions as presented in the Chapter I.
3. Use of tables and graphs are urged but they should be as simple and comprehensible as possible.
4. There should be narrative description per figure but only the important ones should be emphasized.

CHAPTER IV

Space
Space

RESULTS AND DISCUSSION

Space
Space
Space

This chapter provides the data gathered, the results of the analysis, and interpretation of findings. These data are presented in the following tables regarding the study, “Hello, Love, Goodbye”.

Space
Space ***(4 single space)***
Space

Table 1. The Socio-demographic Profile of the Respondents, M7NHS-SHS, December 2022, SY. 2022-2023.

CHARACTERISTICS	FREQUENCY (n=50)	PERCENTAGE (%)
Sex		
Male	21	42%
Female	29	58%
Total	**50**	**100**
Age

APPENDIX A. APPLICATION FOR THESIS ADVISER

November 19, 2019

JUAN P. DELA CRUZ, LPT
M7NHS – SHS Faculty

Sir:

We would like to request you be to be our thesis adviser effective this second semester S.Y. 2019-2020. We intend to work on our study entitled "**HELLO, LOVE, GOODBYE."**

We hope for your approval on this request.

Thank you very much.

Very Truly yours,
JUAN P. DELA CRUZ
Researcher

SANNY P. PAMA, HT-VI
OIC Principal
M7NHS – SHS

Sir:

Greetings of peace and prosperity!

The undersigned are the Grade 12 General Academic Strand students at the Notre Dame of Tacurong College and are currently working in their thesis entitled **" HELLO, LOVE, GOODBYE".**

Anent to this, we are humbly asking your good office to allow us to conduct our study in the school.

We are optimistic of your preferential attention regarding this matter.

Thank you and more power.

Sincerely,

CERTIFICATION

TO WHOM THIS MAY CONCERN:

We hereby declare that this submission is our own words and work, to the best of our knowledge, it contains no materials previously published or written by another person. This work does not also contain material which, to a substantial extent, has been accepted for an award of any degree or diploma, except where due to acknowledge is made in the manuscript. Any contribution made to the research of others, with whom we have worked is explicitly acknowledge in the manuscript. Any help that we received in our research work and the preparation of the manuscript is the product of our own work except assistance from our subject teacher, research adviser, and statistician which we also acknowledge.

PERSONAL DATA

Age	: 17
Date of Birth	: April 04, 2002
Place of Birth	: District Hospital
Sex	: Male
Citizenship	: Filipino
Civil Status	: Single
Religion	: Roman Catholic
Height	: 5'4"
Weight	: 58 kgs,
Father	: Ricardo D. Mariano
Mother	: Lilibeth R. Mariano
Language Spoken and Written	: English and Filipino

EDUCATIONAL BACKGROUND

Elementary Education
Marbel 7 Central Elementary School
Year 2013

Secondary Education
Marbel 7 National High School – JHS
Year 2018

PERSONAL INTEREST AND SKILLS

- Singing
- Dancing
- Painting

I. GENERAL GUIDELINES

1. General format:
    a. Font Style: Bookman Old Style
    b. Font Size: 12
    c. Spacing: 2.0 (For chapters 1- 5 only) Other parts may vary.
    d. Justified (Ctrl + J)
    e. Margins, 1.5" left and 1" top, bottom, and right
2. The page number of the first page of each chapter is not stated but counted.
3. One page with the word "APPENDICES" should be placed before the compilation of appendices. Centered, bold, in Bookman Old Style size 40.
4. One page with the word "REFERENCES" should be placed before the compilation of appendices. Centered, bold, in Bookman Old Style size 40.

J. POWERPOINT GUIDELINES

1. On the day of the manuscript defense, not everything should be presented and included in the PowerPoint presentation. PPT serves as an aide to the presentation, hence this must be brief and concise.
2. The font size, style, and color should be visible enough from a distance. Included only seven to eight lines per slide.
3. The PPT presentation can be creative, but one must make sure that everything is readable and comprehensible.
4. Specifically, these are what should be included in the PPT.
    a. Title
    b. Researchers' Names
    c. Statement of the Problem and Research Questions
    d. Conceptual/Theoretical Framework
    e. Two to three similar studies and results.
    f. Methodology
        i. Research Design
        ii. Locale of the Study
        iii. Sampling Procedure
        iv. Research Respondents
        v. Research Instruments
        vi. Data Gathering Procedure
        vii. Statistical Treatment
        viii. Ethical Consideration

        * Not all words should be posted. Only the specific answer, example, under research design, just state "Descriptive Quantitative Design"
    g. Results and Discussion

        * Only the tables and graphs should be included. No narrative discussion should be presented.
    h. Summary, Conclusions, and Recommendations
